CARE AND USE OF THE PRODUCT

• Use the original power supply of your laptop to recharge it via the USB-C Power Delivery (PD) input on this hub.

• Before connecting multiple devices to this hub, please connect the power supply of your laptop to the USB-C Power Delivery input (PD) because our HUB may not provide the power necessary.

• It supports a maximum of 2 hard drives connected simultaneously.

• The SD and micro SD card slots cannot be used simultaneously. The host device will recognize the card being used first.

• USB ports are recommended for data transmission and not should be used as the output current unless the computer or HUB is not connected to a power supply.

• The operating temperature is about 45°C, and is managed with of the dissipation fans inside the HUB.
